

I have been in the computer industry for more than 40 years and participated in the establishment and growth of the internet first hand throughout that time. My passion has been software development as both a contributor and as an architect in both large and small companies and much of my work has been with networks, in a variety of flavors. This technical experience has given me insight into problems within and without the industry.

I am an inventor on 4 US Patents, several of which relate to computer networks.

My service with several non-profit organizations has given me experience in decision making for the advancement of those organizations.

I served as a Director and as President of the Long's Peak Water District (LPWD) for a total of eight years. LPWD is a Colorado Sole Purpose Special District with about 1000 tapholders, an annual budget of \$1.2M and about 5 employees.

I served as Vice President and as Secretary of the Boulder Rifle Club, a Colorado 501(c)5 corporation with about 1000 members and an annual budget of \$400K for a total of about 8 years.

I currently serve as President of the Colorado Dahlia Society, a Colorado Association, with about 100 members and an annual budget of \$7K.

I have found all of these experiences enriching and I think that those organizations were better off as a result of the work that I did there.
